ongoing charge

September 2022 (data as of 31 August 2022)

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund aims to generate a return greater than the benchmark, after the deduction of costs and charges, over rolling three-year periods, through a combination of income and capital growth.

Investment policy

- The fund is actively managed.
- The fund may invest in the bonds of any type of issuer (for example government or corporates) with no restriction on economic or geographic areas (including emerging markets).
- The fund will invest at least 80% in short-dated high yield bonds, which:
 - have a residual maturity of less than five and a half years; and
 - either (a) have been given a credit rating of either: (i) Ba1 or lower by Moody's; (ii) BB+ or lower by Standard & Poor's; or (iii) BB+ or lower by Fitch; or (b) have not been rated but which the Investment Manager believes would, if they were rated, be given a comparable credit rating.
- Corporate bonds (held either directly or indirectly via derivatives) issued by companies involved in the following are automatically excluded:
 - Tobacco: companies which derive more than 5% revenue from tobacco production;
 - Nuclear power: companies which derive more than 5% revenue from:
 - nuclear power plant ownership or operation;
 - manufacturing of nuclear-specific essential components;
 - uranium mining; or
 - nuclear energy based power generation;
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons) or nuclear weapons; or
 - which derive more than 5% revenue from conventional weapons, related components and systems;
- Fossil fuels: companies which:
 - derive more than 10% revenue from thermal coal-based power generation; or
 - derive more than 5% revenue from thermal coal mining or sale, oil sands, fracking or arctic drilling;
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.
- The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. This is achieved through (i) operating exclusions lists, as detailed above, based on industries where the Investment Manager assesses there to be fundamental ESG-related concerns, (ii) taking into consideration ESG risks and opportunities, which may additionally influence the bonds selected depending on the outcome of the ESG evaluation, and (iii) favouring investment in issuers with low or reducing carbon intensity, with the Investment Manager aiming for the fund's carbon intensity (as measured by scope 1 & 2 emissions) to be below that of the ICE BoAML Global High Yield Constrained Index. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.
- The environmental social and governance (ESG) evaluation of individual securities is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data focusing on individual factors and metrics that the Investment Manager considers to be relevant.
- The Investment Manager shall target an average duration, across all of the bonds held by the fund, between zero and two years in normal market circumstances; however there may be times (for example in periods of high volatility or market disruption) when average duration will be above two years. In these circumstances, the Investment Manager shall endeavour to return the portfolio to an average duration between zero and two years as soon as practicable taking into account the best interests of shareholders.
- The fund may use derivatives and other techniques for investment, hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures, forward currency contracts, credit default swaps (single name and indices) and interest rate swaps.
- In particular, the Investment Manager intends to hedge the fund's base currency against the currencies in which the underlying assets of the fund are denominated. There may be certain currency exposures where it is impractical or not cost effective to apply the portfolio hedge, but the intention is that the fund will operate a target hedge ratio of 100%.
- In the event that any bonds held by the fund are subject to a restructuring process, the fund will be permitted to invest in new bonds or equity securities issued as part of the reorganisation process.
- The fund may invest up to 10% of its assets in each of the following:
 - asset-backed securities and mortgage-backed securities;
 - distressed/defaulted bonds;
 - more speculative high yield bonds, where they carry a credit rating from Moody's, Standard & Poor's or Fitch, that have been given ratings whereby none are at or above B- (for Standard & Poor's and Fitch) or B3 (for Moody's) not qualifying as distressed/defaulted bonds at the time of purchase; and
 - other collective investment schemes.
- The fund may also hold money market instruments, cash and near cash subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus.

Benchmark information

- Euro Short Term Rate (ESTR)
The benchmark is a point of reference against which the performance of the fund may be measured. Management of the fund is not restricted by this benchmark. The deviation from the benchmark may be significant and the portfolio of the fund may at times bear little or no resemblance to its benchmark and therefore characteristics such as volatility will vary between the fund and the benchmark.
The benchmark does not take into account environmental and/or social characteristics promoted by the fund.

PERCENTAGE GROWTH

12 MONTHS TO 30 JUNE

12 MONTHS TO 31 DECEMBER

Source: Lipper Limited from 20 June 2019 to 31 August 2022. As this class is in a different currency to the fund's base currency, a local-currency equivalent benchmark has been used. Benchmark data prior to 1 October 2019 reflects the Euro Over Night Index Average (EONIA) as opposed to the Euro Short Term Rate (ESTR). All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class.

RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from www.artemisfunds.com or www.fundinfo.com.

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Bond liquidity risk	The fund holds bonds which could prove difficult to sell. As a result, the fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
Higher-yielding bonds risk	The fund may invest in higher-yielding bonds, which may increase the risk to capital. Investing in these types of assets (which are also known as sub-investment grade bonds) can produce a higher yield but also brings an increased risk of default, which would affect the capital value of the fund.
Credit risk	Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
Derivatives risk	The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.
Charges from capital risk	Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
Emerging markets risk	Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
Currency hedging risk	The fund hedges with the aim of protecting against unwanted changes in foreign exchange rates. The fund is still subject to market risks, may not be completely protected from all currency fluctuations and may not be fully hedged at all times. The transaction costs of hedging may also negatively impact the fund's returns.
ESG risk	The fund may select, sell or exclude investments based on ESG criteria; this may lead to the fund underperforming the broader market or other funds that do not apply ESG criteria. If sold based on ESG criteria rather than solely on financial considerations, the price obtained might be lower than that which could have been obtained had the sale not been required.

OTHER INFORMATION

This is a marketing communication, before making any final investment decisions and to ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus from www.artemisfunds.com or www.fundinfo.com.

Investment in the fund concerns the acquisition of shares in the fund and not in the underlying assets of the fund.

The fund is a sub-fund of Artemis Funds (Lux) (a "SICAV"). For further information, visit www.artemisfunds.com/sicav.

CHARGES

Initial charge	0%
Ongoing charge	0.410%

The ongoing charge covers the annual operating expenses of running the fund and is shown as at the date of the Key Investor Information Document, where further information about the fund's charges can be found. Additional costs may be incurred, such as portfolio transaction costs and transfer taxes, which may reduce performance.

RISK AND REWARD PROFILE

The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
