INVESTMENT OBJECTIVE

The Impax Global Equity Opportunities Fund ("IGEO") invests in companies possessing sustainable competitive advantages, across listed equity markets and sectors, in order to achieve long-term capital growth. The manager aims to invest in companies with track records of generating consistent returns, which demonstrate above average free cash flow predictability, and where we believe a company's long term opportunities are not necessarily reflected in today's share price. The investment process includes a strong focus on risks arising from the transition to a more sustainable global economy, as well as seeking to harness the opportunities.

Please refer to Impax's **ESG Policy** for more details.

KEY RISK CONSIDERATIONS

Governmental liberalisation of basic services and increased environmental legislation may not occur at the anticipated rate. The costs of technology in environmental markets may not continue to fall or may not maintain price competitiveness.

The Fund's portfolio will include a number of relatively newly established companies and companies whose future is dependent on widespread adoption of their products and services.

Many of the Fund's investments will be denominated in currencies other than the currency of the Share class purchased by the investor and, therefore, the Net Asset Value of the Fund may be affected by currency movements.

The valuations of companies in environmental markets may remain at current level or may fall. For information on additional risk factors facing the Fund your attention is drawn to the Prospectus.

Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries, putting your money at greater risk.
